Net Assets	\$12.37 billion
Expense Ratio	0.35%
Distribution Schedule	Quarterly

Overall Morningstar Rating out of 1118 Large Value funds based on risk adjusted returns as of 03/31/24.

See reverse for additional information about the fund.

About the fund

- NOBL's holdings are the S&P 500 Dividend Aristocrats: high-quality companies that have not just paid dividends but *grown them* for at least 25 consecutive years, with most doing so for 40 years or more.¹
- Often household names, NOBL's holdings generally have had stable earnings, solid fundamentals, and strong histories of profit and growth.
- NOBL's strategy has a demonstrated history of weathering market turbulence over time by capturing most of the gains of rising markets and fewer of the losses in falling markets.

Fund performance and index history²

	1Q 2024	Year to Date	1-Year	5-Year	10-Year	Fund Inception
ProShares S&P 500 Dividend Aristocrats ETF NAV Total Return	6.98%	6.98%	13.66%	10.76%	10.90%	11.55%
ProShares S&P 500 Dividend Aristocrats ETF Market Price Total Return	6.94%	6.94%	13.57%	10.75%	10.89%	11.55%
S&P 500 Dividend Aristocrats Index	7.09%	7.09%	14.07%	11.14%	11.32%	11.98%
S&P 500	10.56%	10.56%	29.88%	15.03%	12.95%	13.77%

Periods greater than one year are annualized.

Growth of \$10,000 since inception³

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling 866.776.5125 or visiting ProShares.com. Index performance does not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in any index.

Carefully consider the investment objectives, risks, charges and expenses of ProShares before investing. This and other information can be found in their summary and full prospectuses. Read them carefully before investing. Obtain them from your financial professional or visit ProShares.com. ProShares are not suitable for all investors.

¹If fewer than 40 stocks meet criteria, the index may include companies with shorter dividend growth histories. Special dividend payments are not taken into consideration. There is no guarantee dividends will be paid. Companies may reduce or eliminate dividends at any time, and those that do will be dropped from the index at reconstitution. ²Returns are based on the composite closing price and do not represent the returns you would receive if you traded shares at other times. The first trading date is typically several days after the fund inception date. Therefore, NAV is used to calculate market returns prior to the first trade date. ³NAV total returns for the fund are used to calculate Growth of \$10,000.

Star ratings are calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. NOBL was rated against the following numbers of U.S.-domiciled Large Value funds for the following time periods: 1118 for the last three years, 1058 for the last five years, and 816 for the last 10 years ending 3/31/24. With respect to these Large Value funds, NOBL received a Morningstar Rating of 2 stars for the three-year period, 3 stars for the five-year period, and 5 stars for the ten-year period. Past performance is no guarantee of future results. ©2024 PSA 2020-2304

Index description

S&P 500 Dividend Aristocrats Index

- Invests in the S&P 500 companies that have increased dividends each year for at least 25 consecutive years
- Contains a minimum of 40 stocks, which are equally weighted
- Limits the weight of any single sector to no more than 30% of the index
- Is rebalanced each January, April, July and October, with an annual reconstitution during the January rebalance
- Inception: 5/2/05

Annualized performance

Definitions of terms: "Standard deviation" is a statistical measure of the variability of a portfolio's returns over a period of time. A higher standard deviation implies more risk. Here, standard deviation is annualized. "Annual turnover" is a measure of the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets. ⁴Holdings are subject to change. ⁵Sum of weightings may not equal 100% due to rounding.

Investing involves risk, including the possible loss of principal. This ProShares ETF is diversified and entails certain risks, including imperfect benchmark correlation and market price variance, that may decrease performance. Please see the summary and full prospectuses for a more complete description of risks. **There is no guarantee any ProShares ETF will achieve its investment objective.**
